

ARRA INPUT LIST 2022

ARRA will bring our sound rack with (2) Midas M-32C modules to run our In Ear AND FOH sound production (Independently from each other). We will provide you a left-right feed for the FOH (A/B on rack panel) and all channels will get pinned to the front channel faceplate on the bottom of our rack (Channels 1-24 plus A-D) that will feed both of our Midas M32-Cores through our Midas DL231 Mic preamp stage box splitter, all self-contained in the rack.

Questions, please contact Kevin Conner @ 630.327.8165

ARRA INPUT/OUTPUT PANEL:
